Clears Water on Plane

Features:

- Suitable for salt or fresh water
- Easy 5 hour installation - even when boat is in water.
- Less drag than inboard bow thruster
- Silent operation
- Total control - less insurance claims

Pivot Point Advantage:

- Mounted at farthest point forward unlike conventional bow thrusters that need to be in the hull closer to the center
- Requires less thrust
- Uses less amperage
- Maneuvers more accurately

Maintenance:

- Conventional bow thrusters are plagued with weeds, Zebra Mussels and Barnacles. **SIDESHIFT** does not have these problems since it is not installed in a pipe
- Once a year check the anodes and change if necessary

Models:

SS230

\$3995.00CAD

- 5hp (Boats 20-30ft)
- 12 Volt DC
- 300AMP Draw

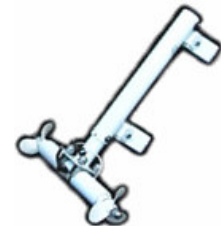

SS340

\$4995.00CAD

- 10hp (Boats 30-40ft)
- 12 Volt DC
- 600 AMP Draw

SS340HD

\$5995.00CAD

- 20hp (Boats 30-40ft)
- 24 Volt DC
- 600 AMP Draw
